

## WHO IS FRANK KUBIC?

Throughout his life, Frank Kubic has recorded his observation on life in the spirit of personal experiences. He communicates his experiences best with maxims, proverbs and epigrams in his books.

His anecdotes are intended to be thought-provoking, and entertaining. But in politics his proverbs are intended to be serious, and wise to hear!

A life abundant in experiences provides much of who Frank Kubic is. On the low side he spent eight years in an orphanage and saw his father lose three homes to relatives; therefore it is not difficult to understand why freedom and happiness are important to him.

On the high side of his life, Kubic has six grown children and they and their partners show him affection. Frank has seen the world twice; once from the alleys of cities as a merchant mariner. Then the second time in jet-set style, as a Method Engineer for the United States Government. In this capacity Frank was treated like a king by many nations, but he has never forgotten the Bronx, New York where he was born, and how lucky he is to live in West Virginia with his wife Anne for the past twenty years!

## POLITICAL PHILOSOPHY OF FRANK KUBIC

Frank Kubic's political philosophy today in summary is as follows: He believes that the function of the government is to protect people from people; it is not to reduce their freedom and property rights and privileges in the name of imperfect planning, safety, inspections, fees and other unnecessary government created hurdles.

He sees serfdoms increasing at an alarming rate throughout the United States, and not just in Jefferson County, West Virginia. Very few people understand that land taxes and land serfdom fees that do not address their intent produce the same results! Results that is inordinately evil in the future.

Frank Kubic sincerely believes that liberty, freedom, and happiness is the good life, and that they will be lost forever once too much self-serving ideas become the true and hidden real reason to seek political office in Jefferson County, West Virginia.

## WHY DOES FRANK KUBIC WANT TO BE A JEFFERSON COUNTY COMMISSIONER?

Frank wants to become a Jefferson County Commissioner. He seeks a chance to try to change the philosophy of the present Jefferson County Government away from further drifting toward serfdom and back to individual freedom again. Freedom founded the State of West Virginia and this fact is extremely important to remember on the two 2008 Election Days in Jefferson County and everywhere else in West Virginia!

If you are registered voter and live or own property [real or personal] in Jefferson County, it is saving your liberty, freedom, and property rights and privileges that are the reason why Frank Kubic wants to become a Commissioner.

## EMPLOYMENT HISTORY OF FRANK KUBIC

Frank Kubic is 81 and his employment history is as follows: Stock boy and messenger boy, also a soda jerk before the age of fifteen. He served three years in the U.S Navy in the Pacific, WWII. He sailed the world for four years. After college, he became a time study man for Federal Radio and Telegraph Company in Clifton, New Jersey for three years. Then he moved on to become an Industrial Engineer for the International Business Machine Corporation in Kingston, New York for four years. He joined the Washington Hospital Center as their first and only Methods Training Office for four years. He was hired by the U.S Department of State and served there for 23 years. He is the only Industrial Engineer who ever worked in the U.S Passport Office. He raised sheep in Jefferson County, West Virginia for twelve years.

## **FRANK KUBIC'S OBSERVATIONS OF THE JEFFERSON COUNTY LAND OWNERS MEETING IN RIPPON ON JANUARY 17, 2008**

[No elected person in Jefferson County, WV attended the meeting.]

The meeting was a demonstration of courage and anger. Paul Ashbaugh's leadership at the meeting can be judged as "street smart" of the highest value and courage. No nation, church, state or business, and school of learning can survive without a few street smart men in their ranks!

I saw Paul Ashbaugh in action and I say he is a good man! He epitomizes the same behavior that the founding fathers of the United States of America demonstrate over 200 years ago.

Paul's neck is way out for the good of the people who will reside in Jefferson County, WV in the future, and perhaps the entire country, certainly as far away as California. The definition of a deadly economic recession is no growth. It is also the definition of hunger, poverty and early death.

The following was said at the meeting: California and Michigan and ten other states are in a recession [CNBS IS THE SOURCE] today. Not said but true, "California is number one in the practice of serfdom political economics."

All of the people who spoke at the land owners meeting confirmed my belief [Frank Kubic] that the Government of Jefferson County has become a loose cannon.

The county commissioners are not evil people, but what they are doing to liberty, happiness and personal and real property rights and privileges for the people in Jefferson County is inordinately harmful for the future.

There is no word to describe this political behavior. A no-growth probation agenda and a no freedom agenda is the same agenda. I personally advised the land owners to call their dilemma "**serfdom economics**;" because when property and slavery are put together as it is in Jefferson County, WV it becomes an unidentifiable tax system. Serfdom economics is a tax on life, liberty, freedom and happiness.

Life, liberty, and happiness are the source of wealth. Paul Ashbaugh is a leader. His hands are as rough as sand. His street smart education is in his heart. Paul's behavior is truly courageous.

Polished educated men as it is with silent men never won a war or a victory. Silent voters pay the highest taxes and their children suffer the most subprime debt.

The meeting in the Church basement in Rippon, WV produced the following wisdom: There are two ways to change the future for the better. One is now. The other is tomorrow. Now is on Election Day. Tomorrow could be your children's loss. Now is civilized. Tomorrow is what we do or do not do today.

This observation is provided by Frank Kubic who is the wisest 2008 candidate for County Commissioner.
