

John,

Courtney and I are happy to make the following recommendation.

"Contractor John does incredible work. I've been fortunate to see several of his projects throughout the city of Chicago and have been so impressed by the transformation I've seen take place - not least of which is the work Contractor John and his team did in the condo we currently live in. He turned what was a dark, confined and outdated kitchen into an absolutely beautiful space. As church planters in the city we have people in our home literally every week and our guests simply rave about the kitchen. It's not just that John has done a great job with the aesthetics, he really gets the big picture and tries to create space that is current and functional. The work he did on our kitchen is outstanding and has created so many opportunities for us in our ministry to love and welcome others in our home!"
