**Value, comfort, and a better environment come standard with every ENERGY STAR® qualified home from Jarman Homes.**

## OUR HOMES PROVIDE:

### LOWER MAINTENANCE

Enjoy the peace of mind that comes with a low-maintenance home. Tight construction and long-lasting, efficient equipment make our homes more durable, helping to minimize many of the maintenance problems found in typical homes.

### LOWER UTILITY BILLS

Our ENERGY STAR qualified homes use substantially less energy—delivering \$200 to \$400 in annual savings. Over the average 7 to 8 years you may live in your home, this adds up to thousands of dollars saved on utility bills.

### COMFORT AND QUIET

Properly installed energy efficiency features deliver better protection against cold, heat, drafts, moisture, pollution, and noise. Our ENERGY STAR qualified homes help to provide consistent temperatures, improved indoor air quality, and greater durability.

### PEACE OF MIND

Home buying is complex enough without having to know all the details of energy-efficient construction. Instead, simply look for the ENERGY STAR label to easily identify homes that are truly qualified as Energy Efficient.

### CUSTOMIZE YOUR OWN ENERGY EFFICIENT FEATURES

Jarman Homes can help customize your home with an array of energy efficient and environmentally friendly products. We will help analyze and understand which products and building techniques best fit your personal needs.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
