PARENTING GRAND SUPREMACY, is destined for each mother and father. The results of this opportunity are for each parent to obtain the finest of any human gift possible to receive! What exactly is that? It is exactly this. If you take a good look at time each of us live on this earth that is relatively short compared to **HISTORY**.

What arrives after we leave this short life on earth? It is exactly this. After we stop this short life, **ETERNITY** arrives to each of us. It is then we arrive at one or two places. **HEAVEN or Hell.**

HEAVEN = the HOME OF GOD! This can be the place of great happiness, delightful, paradise, bliss, or even a dream come true. One good explanation is this. JESUS, said, **“I AM THE RESSURECTION AND THE LIFE. THOSE WHO BELIEVE IN ME LIVE, EVEN THOUGH THEY DIE. DO YOU BELIEVE THIS?”**

HELL = HOME OF DAMMED SOULS! SOUL, is an interesting word most of us do not think about much in today’s society. Check it out in a dictionary. SOUL, is the one for some major talk on what most of us do not discuss in our family’s today. This is powerfully important to each parent as it has **ETERNAL CONSEQUENCES.**

ETERNAL has terrific meaning to it as **ETERNAL** never has an ending, like this life has on this earth. Now to some real interesting truth for all of us about the medical profession best of circumstances.

The truth is exactly this. Our medical professionals know all about the heart, plus major truths about our brain. One thing they do not know physically enough about is

our SOUL. Regardless of words we say verbally, JESUS is the only one that can know exactly what is inside our individual SOUL, that each of us possess. An example is like this to most people. One can say verbally, “I BELIEVE” with words yet their physical actions tell a different story.

As a parent how does all this directly affect you and your family? It is exactly this. GOD, has placed you here as a parent. With the two (mom & dad) coming together as one, now you have 3 or more. As a temporary setting the two of you (mom & dad) are placed in a setting like GOD. Do you **remember HE SAID, “I WILL MAKE MAN IN MY IMAGE?”** Well, he did exactly that. Beginning in parenting each parent is exactly that. Parents are in charge of feeding, clothing, security, warmth, holding, providing, medical provisions, plus others especially like education! Change is continual, constant, changing until the day we pass on and enter ETERNITY as in **HEAVEN or Hell!**

Us parents can not make the decision for each of our children in our SOUL as to where each will be in ETERNITY. **That is solely the decision of JESUS!** Parents, each of us should constantly remember that truth, permanently, constantly, so that each of our children

individually begin to live it for benefit of themselves plus their upcoming families. **Remember JESUS himself said “IT IS MORE BLESSED TO GIVE THAN TO RECEIVE”.** Also, there is no bigger giver than JESUS, himself inside the whole universe! HE took the nails through his hands and feet for all of us.

EACH OF US HAS AN ETERNAL CHOICE!

Here is another important fact of truth most of us do not think about. JESUS said on occasions, **“I AND THE FATHER ARE ONE!”** That means to this grandpa that

JESUS is the same individual person as **THE FATHER, THE SON, AND THE HOLY GHOST!** We people inserted GOD to the CROSS TO CRUSIFY HIM! Then after death **HE PROVES EXACTLLY WHAT HE VERBABBLY SAID, 3 DAYS LATER HE AROISE FROM THE DEAD. HE DID EXACTLY WHAT HE SAID.**

NOW AS WE MOVE INTO THE NEAR FUTURE, we will do more visiting on the topic we chose. PARENTING GRAND SUPREME. NONE of us should repeat mistakes we have performed in the past. This is the present and it is a present to be here.

With yesterday being gone, it cannot be changed as it is so called HISTORY and cannot be changed regardless of what we say. Each of us can make good plans for the near future. Then we each need good energy, determination, energy with intelligence to begin the good future with satisfactory results. Remember the old phase, "THE PROOF IS IN THE PUDDING?" Here is a large concern relating to those short words that give life energy to parenting. Each of your children are observing you and your lifetime actions! Parents are the real pudding in each of their lives. They are observing,

looking, learning, from all your lifetime actions in real life! How so? What are they really learning from observing each of our actions? Can each of us parents take a good look at exactly what we are doing to our spouse? What does that teach our children about how to live plus more valuable how to invest their live into the near future? What are they really learning in their young life to invest into the near future? These are some good questions for each of us to investigate into for the future of our families. Let us get serious on several opportunities with a good look, on several different subjects. Here we go on a few. Get ready as these are super serious.

HOME CHORES are unending in life. Parents need to learn how to have them performed with pleasure, not negativity. This really begins at toddler stage then never ever ends until the day we leave life on this earth. They should not be treated as a negative, more as a positive. Parent need to get real good at doing chores with each child as the child ages and becomes more adulting into abilities. The ability of the beginning child is little, yet gains as time moves on. Plus, there is another super powerful asset that arrives. It is the bonding, welding,

gluing of the child parent relationship of LOVE & SHARING TOGETHER! Are you two really ready for that?

MEAL PREPARATION should be appreciated along with doing the dishes. Both are a portion of life living. Meal preparation is fuel to our body, similar to taking your auto to the fuel station. Some how our body takes food and changes it into observation, smelling, feeling, thinking, plus other beneficial actions. Even doing the dishes is beneficial. Cleanliness with next opportunity to us instead of dirty message stinky, buggy mess to prepare the next meal.

FINANCES, are a constant action that gets early attention in all of our lives. Parental financial opportunities are usually not talked about unless in a negative way.

Money is worshiped in our society mostly over GODLINESS. One important item to remember is exactly this. At a funeral you never ever see a U HAUL, as you cannot take it with you!

Parents need to constantly, with effort, teach their children how to make good investments with dollars. Once done then have good short conversations on if that investment was well.

COMMUNICATIONS, are always in constant changing fashion. The cell phone has drastically had the largest impact on us. Gone is the old phone booth, plus public pay phones and long distant phone charges. Now you can see who you are talking too. Plus, you can record all your conversations. Get used to your cell phone as it is a super valuable investment. Some day your children may even approach you on how you can use it better!

CLOTHING becomes precious kind of early in each of our lives. Why is that? Several different causes. A few are warmth, visual, cost, comments, changes in public styles, all along with personal decisions. Many conversations can be with this subject we are visiting with. Care, cost, cleaning, style, all are factors to consider. Home chores are also a factor for parental consideration.

FREINDSHIP BUILDING, has become a real talent parents need to give gigantic attention too. Children learn all about parental friends first. Who treats them well and who does not? Youth have a great tendency to follow in the footsteps of their parents. Friendship building is a constant in our lives. One more important action on this subject.

We need to learn how to correctly end friendships when the time is right. As time moves on friendships can make a negative turn in the wrong direction. It is good when we recognize this tendency, then politely, correctly, gently leave the relationship. Parents should get good at this with good teaching events to each of their children.

EDUCATION, is a constant inside each of us people, as it never ever ends. Need a good example? This would be the home telephone disappearance. Now with your cell phone you can see who you are talking too, obtain data from the internet, record all conversations, plus much more. Technology is on the move, stay up with it, then your children will not have to teach you how to best use current electronics.

HABITS are communicating parent to child and child to parent. These are usual in standard behavior. The children normally repeat the repetitive actions of their parents. Both generations can get real good at evaluating each, then taking the best of the best in repetitive behaviors. When you get good at it wonders begin to arrive inside the whole family.

OPPOSITES, now here should be a favorite subject of you to discuss in opposites. What are opposites? They are exactly this, **BOYS AND GIRLS AS IN MALES AND FEMALES!** You should be able to handle that well, yet may be try to get your **THINKER, THINKING BETTER!** This becomes a gigantic portion of good parenting from both the child's mother father, even grandparents! How can we be pleasant, Serve GOD well, plus do actions **HIS WAY not the worlds way?** More later as we continue to move on!
