Introducing...

EZ-DigiSign™

**We Make it
Easy!**

What is Digital Signage?

Digital signage is emerging as the next generation sign technology. It uses the latest LCD monitors and flat screen televisions to display digital signs. Digital signs can be displayed on one or multiple screens and be modified in real time. Digital signs are proven to attract and keep attention, which makes for an excellent new way to advertise or display important information.

Why EZ-DigiSign?

EZ-DigiSign has created an amazingly simple approach to digital signage. Using the EZ-DigiSign subscription service, the power of the Internet is leveraged to create and display digital signs that are placed in sequence. The EZ-DigiSign player features PlugAnd-Display™ technology that makes the set-up and operation of signage easy, even for the non-technical.

EZ-DigiSign.com™
