

## **Panels and Components for Red Roof Inns (1990-present)**

(Manufactured for Billco Products, Holland, Mi)

For the past 18 years Billco Products Inc. has been manufacturing furniture for the interiors of Red Roof Inn guest rooms and lobby areas. Over that same period Bourne Industries has been supplying Billco with laminated panels to make this furniture. Bourne has also, when requested, supplied Billco with cut, edgebanded, and machined components for this furniture.

All of the panels supplied by Bourne Industries for the Red Roof Inn program have had decorative high pressure laminates on one or both sides. The sizes have ranged from 4'x 8' to 5'x 12'

Components for this program have been for drawer fronts, credenza backs, sides, and bottoms, vanities, check-in counters, etc.

Over the years requirements have changed regularly. Panels have ranged from 1/2" thick to 2" thick. Colors have changed and woodgrains have changed, overall, the quality of the products has improved.

This program has been so large over the years that **millions of square feet** of panels and components have been supplied. Furniture for **thousands of guest rooms** and hundreds of common areas have been manufactured.
